

Hawaii's AAPI Electorate in 2016

There are over 660,000 eligible AAPI voters, comprising 66% of the state's electorate.

Population Facts

- Largest Asian ethnic groups in Hawaii include: Filipino (351,000), Japanese (311,000), Chinese (198,000), Korean (44,000), Vietnamese (15,000), and Okinawan (7,000). 21% of the Asian population also claims NHPI as a race.
- Largest NHPI ethnic groups in Hawaii include: Native Hawaiian (295,000), Samoan (37,000), Guamanian or Chamorro (7,800), Tongan (4,000). 47% of the NHPI population also claims Asian as a race.
- Hawaii is America's only majority-AAPI state and has the highest NHPI population in the country—26% of the state's population, about 363,000, are NHPI.
- From 2008 to 2012, the number of eligible AAPI voters in Hawaii grew 4%. This compares to a 5% growth rate for the statewide eligible voting population between 2008 to 2012.
- Youth (ages 18-29) comprise 21% of the AAPI electorate in Hawaii.
- AAPIs age 50 and up comprise 47% of the AAPI electorate.

Hawaii is home to 988,000 AAPIs, a 6.9% increase from 2000.

Counties with Highest AAPI Populations (by pop size)

	% of AAPIs in county	Size of AAPI population	% of AAPI CVAP in county	Size of AAPI CVAP
Honolulu	51%	499,565	51%	351,350
Hawaii	33%	61,650	33%	44,835
Maui	36%	57,315	34%	37,925
	% of NHPIs	Size of NHPI population	% of NHPI CVAP	Size of NHPI CVAP
Honolulu	9%	85,755	7%	49,775
Hawaii	11%	20,770	10%	13,680
Maui	10%	15,515	8%	8,455

Challenges to Voter Participation

- 42% of Asian Americans in Hawaii speak a language other than English at home, and of those, more than 24% speak English less than "very well."

Voter Engagement and Identification

- Voter contact is a large, unmet need among AAPIs. In the 2012 AAPI Post-Election Survey of registered voters, 74% of Pacific Islanders and 69% of Asian Americans received no contact about the election, compared to 64% of Latinos, 61% of African Americans, and 57% of whites who were not contacted.
- Among those contacted, Democrats had the most reach (50%), followed by Republicans (42%) and nonpartisan community organizations (25%).
- In Hawaii, the lack of contact among Asian Americans was even higher, at 80% of registered voters.
- There is also a large opportunity for voter education through contact. In the same survey of registered voters, 47% of Asian Americans and 37% of Pacific Islanders did not declare an identification with either political party, compared to 20% of African Americans, 31% of Latinos, and 36% of whites.

Importance of Language Access

Turnout is 9% lower for Limited-English Proficient (LEP) than non-LEP registered voters according to the 2012 AAPI Post-Election Survey, and 63% say that Asian language support at polling places would be useful.

Socioeconomic Challenges

- About 29,000 Asian Americans in Hawaii (5.5%) lack health insurance.
- About 35,300 Asian Americans in Hawaii (6.8%) live in poverty.
- About 31,000 NHPs in Hawaii (23%) live in poverty.

Multilingual Voter Hotline

If you, or anyone you know, has difficulty with language access or needs any other type of voting assistance (including questions about polling locations or voting procedures), please call the National Asian American Voter Hotline at 1-888-API-VOTE (1-888-274-8683).

Data on growth of AAPI CVAP from report by New Organizing Institute Education Fund. Data on language access, voter engagement and identification from the 2012 AAPI Post-Election Survey. Finally, with respect to population and CVAP numbers: In order to capture Asian Americans and Pacific Islanders who are mono-racial as well as multi-racial, we have calculated statewide population and electorate numbers using the Public Use Microdata Sample (PUMS). We do this to overcome two problems: CVAP numbers provided by the U.S. Census do not include multiracial AAPIs, and we cannot double-count when adding multi-racial population numbers from FactFinder tables (more than 10% of multi-racial AAPIs say they are Asian as well as Native Hawaiian or Pacific Islander). Resident numbers regardless of age and citizenship are derived from the 2014 ACS 1YR PUMS file. We derive the number of CVAP by multiplying residents by the proportion CVAP, which is calculated using the latest 5YR PUMS file to improve precision. Any other characteristics of the population is based on the ACS 5YR PUMS file to provide the most precise estimates possible. Finally, the PUMS file does not contain large enough samples for county estimates, so we rely on the Census Bureau's Special Tabulations of the Citizen Voting Age Population, which provides county estimates but does not include multiracial AAPIs.
