Methodology

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and AAPI Data with funding from the University of California (UC) Riverside. Data were collected using the Amplify AAPI Monthly survey drawing from NORC's Amplify AAPI® Panel designed to be representative of the U.S. Asian American, Native Hawaiian and Pacific Islander (AANHPI) household population. The survey was part of a larger study that included questions about other topics not included in this report.

Interviews for this survey were conducted between December 9-17, 2024, with Asian Americans, Native Hawaiians and Pacific Islanders 18 years of age or older representing the 50 states and the District of Columbia. Panel members were randomly drawn from the Amplify AAPI Panel, and 1,045 completed the survey—1,042 via the web with 3 by telephone. Panel members were invited by email or by phone from an NORC telephone interviewer. In addition to English, the survey was offered in the Chinese dialects of Mandarin and Cantonese, Vietnamese, and Korean, depending on respondent preference.

Once the sample was selected and fielded, and all the study data were collected and made final, a poststratification process was used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census region, race/ethnicity, education, U.S. born, and Asian origin. Weighting variables were obtained from the American Communities Survey (ACS) 5 years data 2017-2021. The weighted data reflect the U.S. Asian American, Native Hawaiian and Pacific Islander (AANHPI) household population, including all 50 states and the District of Columbia.

More methodology details, including on Amplify AAPI, can be found in the January 2025 AAPI Data / AP-NORC survey report, which can be found at https://aapidata.com/
